1. The first step in the process of the cell cycle is the G1 phase. During this phase, the cell grows and prepares for division. The DNA is replicated, and the organelles are duplicated. The cell then enters the S phase, where the DNA is synthesized. This is followed by the G2 phase, where the cell grows again and prepares for the final division. The cell cycle then enters the M phase, where the cell divides into two daughter cells. The G1 phase is the longest phase of the cell cycle, and it is also the phase where the cell is most susceptible to external factors. The S phase is the phase where the DNA is most vulnerable to damage. The G2 phase is the phase where the cell is most susceptible to errors. The M phase is the phase where the cell is most susceptible to chromosome segregation errors.

Module No.	Module Name	Duration	Prerequisites	Assessment	Outcome
1	Introduction to Information Systems	3 Weeks	None	Exam	Understand the role of information systems in an organization.
2	Programming Fundamentals	6 Weeks	None	Lab, Exam	Develop simple programs using a high-level programming language.
3	Database Systems	6 Weeks	Programming Fundamentals	Lab, Exam	Design and implement a database system.
4	Software Engineering	6 Weeks	Programming Fundamentals	Lab, Exam	Apply software engineering principles to the development of software systems.
5	Networking Fundamentals	6 Weeks	None	Lab, Exam	Understand the fundamentals of computer networks.
6	Operating Systems	6 Weeks	Networking Fundamentals	Lab, Exam	Understand the concepts and operations of operating systems.
7	Web Development	6 Weeks	Programming Fundamentals	Lab, Exam	Develop web applications using client-side and server-side technologies.
8	Mobile Application Development	6 Weeks	Programming Fundamentals	Lab, Exam	Develop mobile applications for smartphones and tablets.
9	Cloud Computing	6 Weeks	Networking Fundamentals	Lab, Exam	Understand the concepts and services of cloud computing.
10	Security Fundamentals	6 Weeks	Networking Fundamentals	Lab, Exam	Understand the fundamentals of computer security.

100	

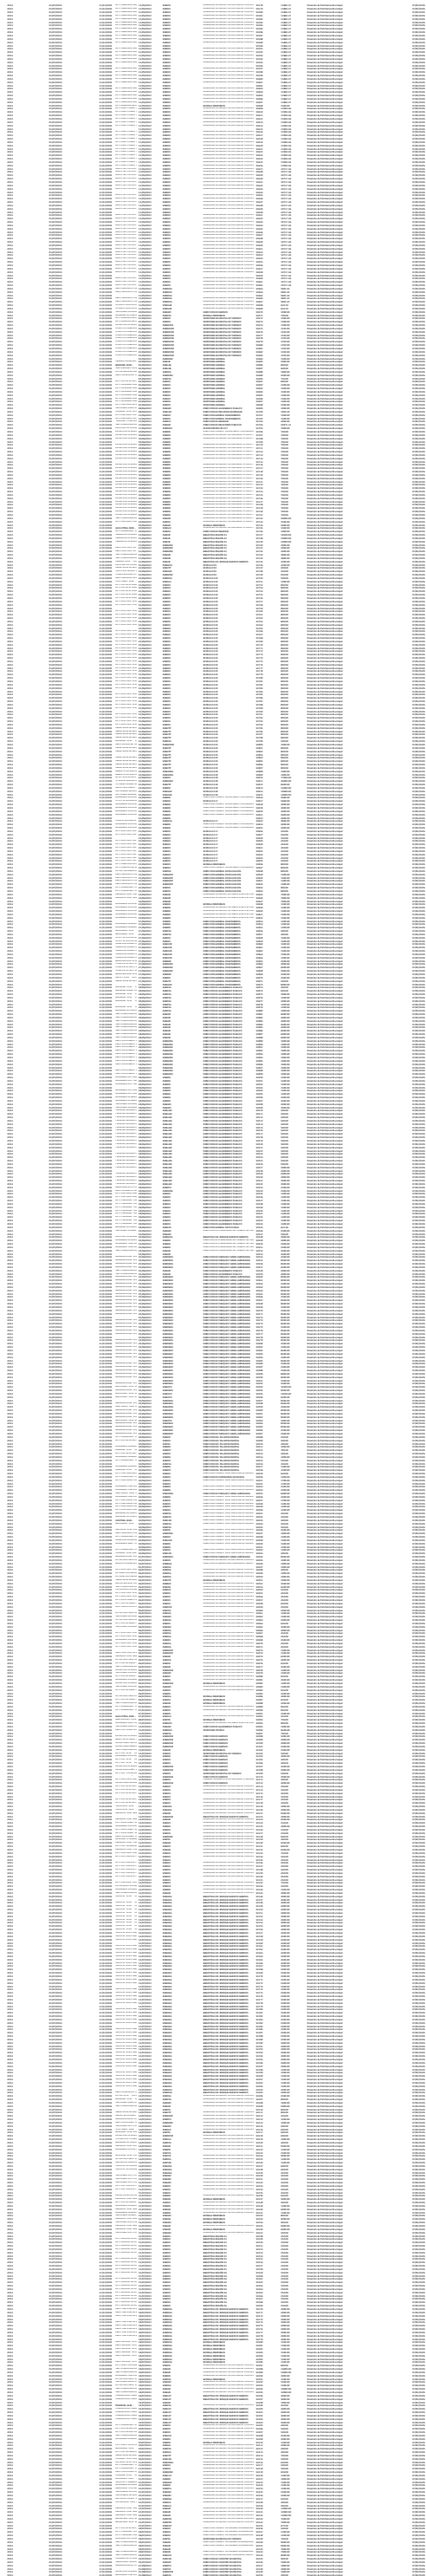

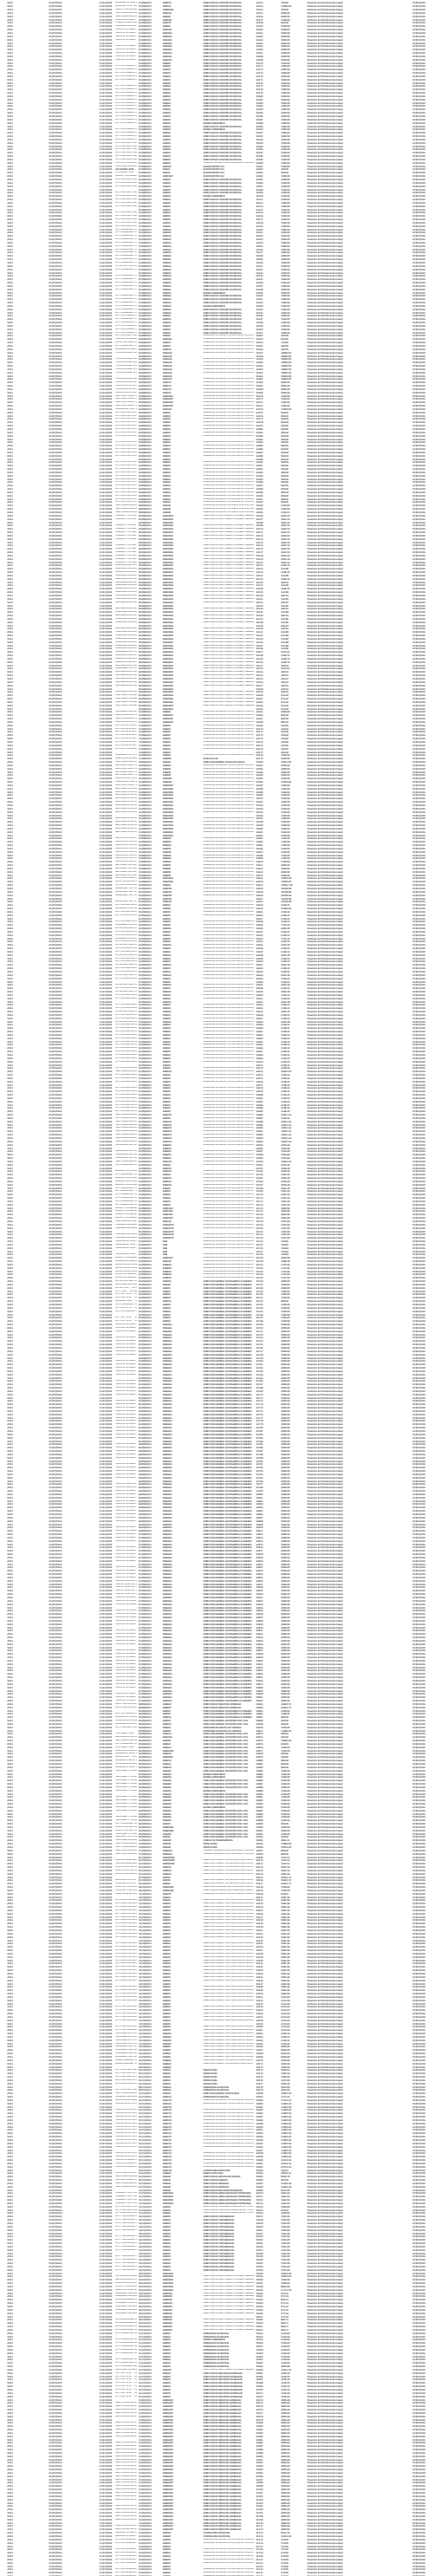

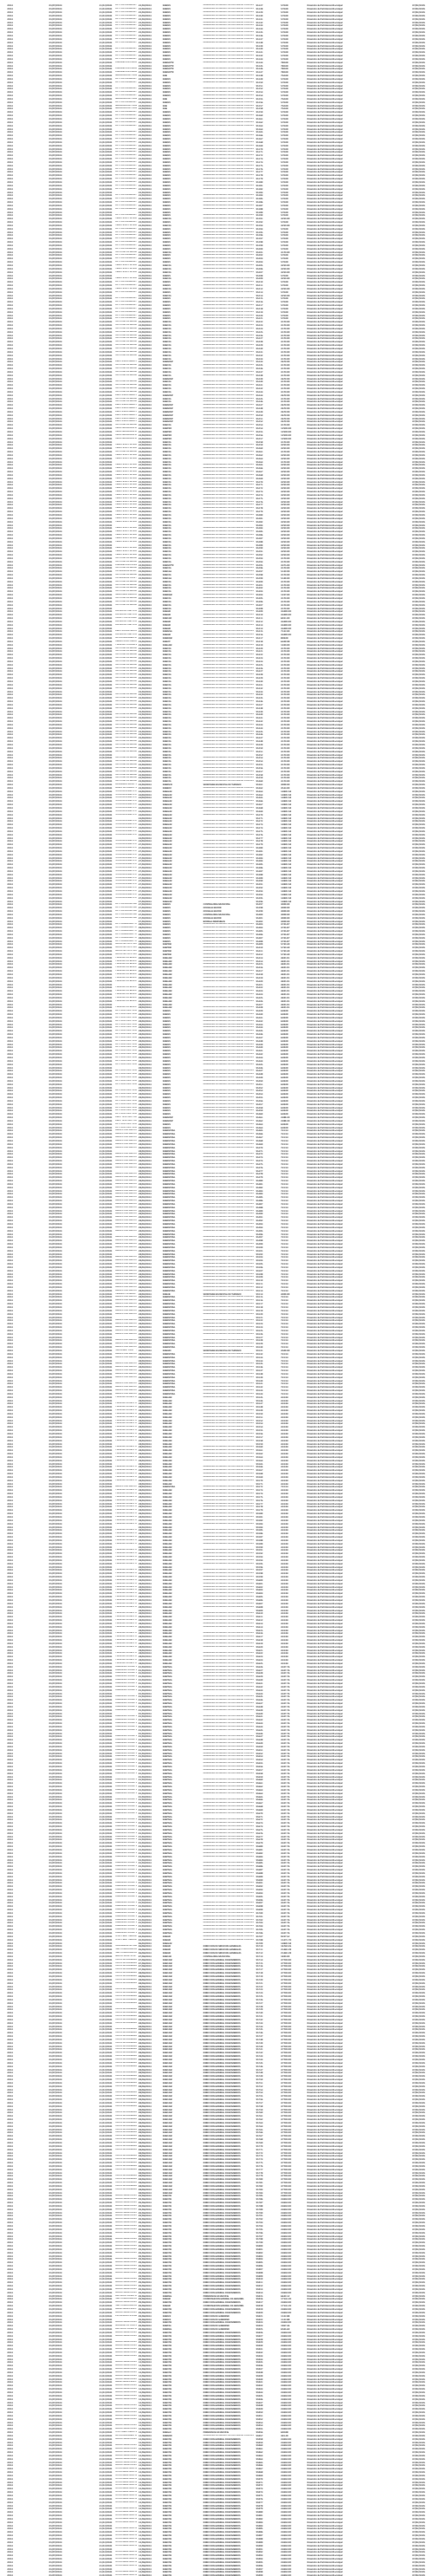

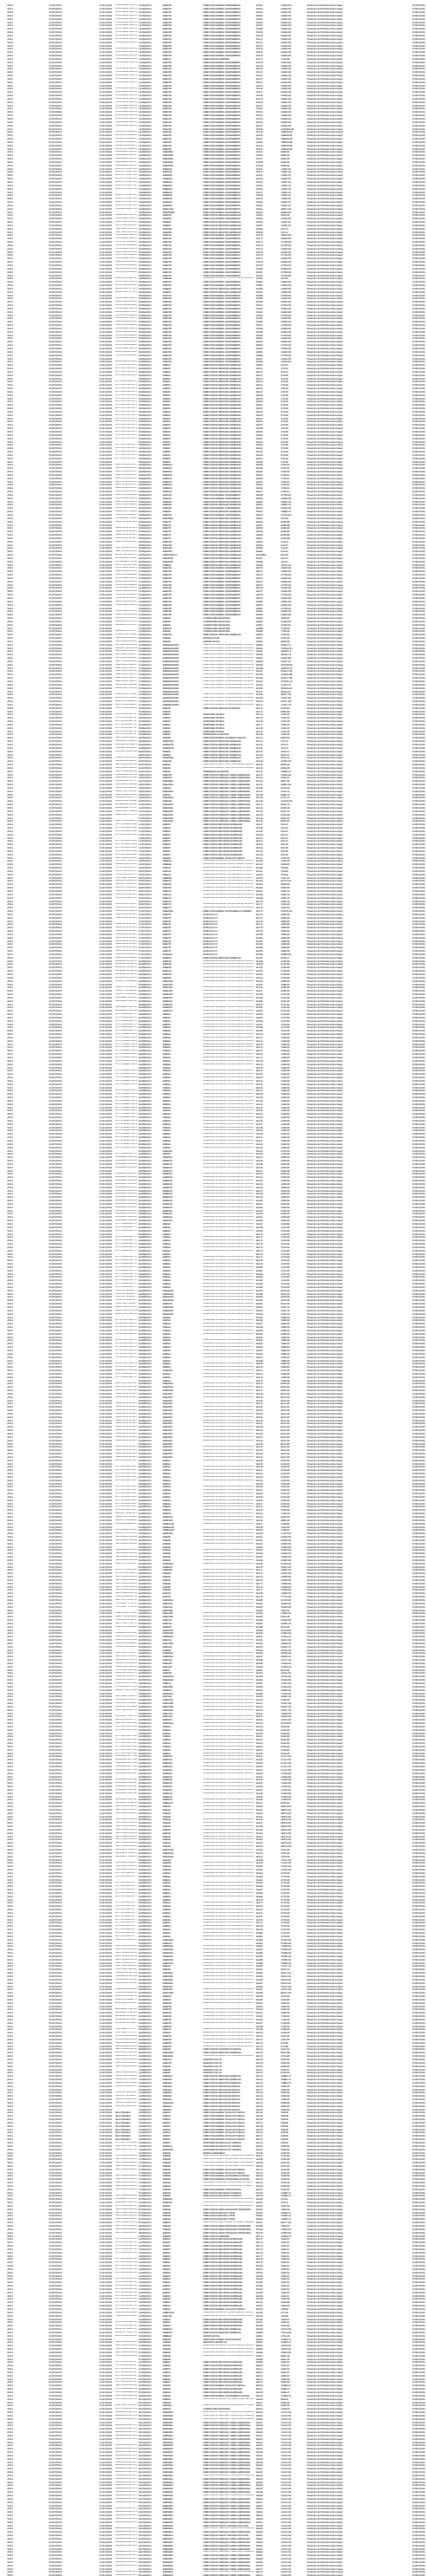

Table with 10 columns and 1000 rows. The columns are labeled: ID, Name, Address, City, State, Zip, Phone, Email, Birthdate, and Gender. The data is organized into 10 groups of 100 rows each. The first group (rows 1-100) contains names starting with 'A', the second with 'B', and so on, up to 'J'. Each row contains a unique ID, a name, a street address, a city, a state, a zip code, a phone number, an email address, a birthdate, and a gender.
